Job Description: **PHP Developer and Linux Administrator**

### **Main Responsibilities:**

Under guidance of the Technology Head, to provide necessary technical expertise to (1) support the day to day administrative tasks of the Linux systems, and (2) customise and enhance existing applications. Administration work will focus on improving the stability and performance of the system, maintaining and improving the security posture of the system, continuous monitoring of system health, and troubleshooting issues that arise. Programming work will involve customisation and improvement of PHP-based applications. This position is full-time and based in our office at Clifton Block 4, Karachi, Pakistan.

### **Experience/Skills Required:**

#### Knowledge, Skills and Abilities:

- Development experience with **Core PHP** in building large-scale systems.
- Strong concepts in **OOP** and **design patterns**.
- Expert knowledge of Opensource platforms such as **Wordpress, Joomla, Moodle, E-commerce**, Opensource **CRM** (Customer Relationship Management) and **CMS** (Content Management) Systems and frameworks like **Laravel & Codeignitor**.
- Familiarity with web-based technologies, including but not limited to, reverse proxy servers, three-tier architecture, service oriented architecture, http, apache & ip-tables.
- Deliver across the entire app life cycle – **concept, design, build, deploy, test** and **deployment on production**.
- Databases: **MySQL, SQLite**

#### Education & Experience:

- A Bachelor's degree; or equivalent combination of education and work experience.
- 2-3 years of PHP programming & system administration experience in Linux environments. Proficient in tasks such as shell scripting, creating cron jobs, analyzing log files, managing user accounts and groups, configuring iptables, and setting up backup services and database syncs.
- Strong hands on programming experience using open source technologies. **PHP, JavaScript, jQuery, HTML, CSS, Open Source CMS**.
- Strong programming background especially in data structures, algorithms and design patterns.
- Detail oriented and able to get things done quickly and to high quality standards.

**D131 Clifton Block 4  
Karachi, Pakistan**
